DETAILED ACTION

This Office Action is in response to the preliminary amendment filed 1 August 2001.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36-45 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 36-45 disclose a source or drain region elevationally above the channel region and one of the regions to have a portion thicker than the channel region. These limitations are not described in the specification and therefore are considered new matter.

Claims 46-55 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 46-55 disclose a second thin film source/drain region, where the first source/drain region has a different

thickness than the second source/drain region. These limitations are not described in the specification and therefore are considered new matter.

Claims 56-60 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 56-60 disclose an annulus having a top disposed elevationally below the upper surface, a first and second diffusion region disposed over the upper surface. These limitations are not described in the specification and therefore are considered new matter.
